

Discover
the New Generation Prepaid Card...

Set your project free...

With Dynamicard Process®, discover a new “cards” partner, who goes that extra mile. Beyond largely automated production, Dynamicard Process® also offers you :

- **Full production management** (choice of printing material, cut, personalization, packaging etc), suited to the solution you want.
- **Integration of your card** into its operational whole : security management of data, production and assembly, and logistics of final package...

**For each function...
it has a reliable and innovative solution.**

➤ **Developing client loyalty**

- Marketing campaigns
- CRM

➤ **Identification**

- Private uses
- Membership cards
- Health cards

➤ **Payment and Prepayment**

- Telecom recharge cards
- Withdrawal cards
- Remittances
- Purchase coupons

... Have the Dynamicard Process® reflex.

With wide experience in the production of secure documents (check books, lottery tickets etc) and in the prepaid card market (Scratch cards / GSM recharges), the Dynamicard teams have designed a production process in which every stage has been optimized so as to offer you innovative products and high quality at the best prices.

> Faster...

Based on full industrial integration (a single site for the entire process) and state-of-the-art equipment, we commit to **our delivery dates**.

- Automation of processes.
- Reduced adjustment time.
- Delivery dates under control.

> More flexible...

We have designed **an innovative range** of cards, **which can be adapted to all your needs**:

- Face value
- Distribution method
- Security level
- Quantity

This way you can free up your marketing projects **by presenting all the cards' visuals and shapes...**

- Flexibility of production.
- Wide range of materials, shapes, packaging etc

> Safer...

Our production, which is in the process of obtaining ISO certification, ensures you **three levels of security** :

- **Physical security** with **buildings protected** against intrusions, **equipment for access control** and electronic surveillance.
- **Logical security** with **computerized encryption** to protect the confidentiality when transferring, handling and storing your files.
- **Organizational security** using a range of procedures and controls, to guarantee you **cards that are packed "in order, nothing missing and no duplicates"**. We offer you a **full range of anti-fraud procedures adapted** to risks in prepayment (forging, reading PIN numbers, recycling used cards).

- Installation at the old manufacturing site of the Mint.
- Experts in fiduciary products.
- Full traceability of flows and production, using CAM.

> More competitive...

The speed and automation of the Dynamicard process, as well as the choices of specialization in well-defined markets let us offer you the very best price quotations.

An ICV innovation

The Dynamiccard Process® business was created and launched by ICV, one of the very first French manufacturers of security printing.

Since 1975 ICV has been the leader in the manufacture of bank checks, remittances and lottery tickets ; with enormous experience in sensitive products, ICV has applied its know-how to Cards' applications.

ICV is a subsidiary of the Multipap Group, the French leader in security printing, and is built on the range of skills at its 12 manufacturing locations.
